PENNSYLVANIA PUBLIC LIBRARY STATISTICS
INTRODUCTION

The statistical report was compiled by the Divisions of Systems Development, Bureau of Information Systems, Pennsylvania Department of Education, using data from the public library annual reports submitted to the Library Development Division, State Library of Pennsylvania. It is divided into eight parts.

PART I provides statistics on registration, staff, books, circulations, interlibrary loan, income and expenditures. The information is arranged alphabetically by county and by the town, township, borough or city in which a library is located.

PART II provides the same statistics as in Part I on a District Library Center level. These figures are based on summaries from all reporting libraries in each district.

PART III - Pie charts of the income and expenditures of libraries.

PART IV lists libraries in descending order by total expenditure. Statistics on population, circulation, collection and income are also included. A percentage of increase or decrease over the previous year is also given.

PART V - Bar charts indicating circulation and interlibrary loan.

PART VI is a ranking of libraries according to population served (Table 1); materials collection (Table 2); and circulation (Table 3). Libraries are listed by library name.

PART VII - Statistics for the State Library of Pennsylvania comparing present year to past year.

PART VIII - State summary, Pennsylvania Public Library Statistics comparing present year to past year.

This publication includes statistics from libraries on a fiscal year and those on a calendar year accounting cycle.

Population served for a local library is considered the population of the municipalities the library serves freely. For members of library systems, it is the population which has predominant access to the library.

In counties where service areas overlap, the total county population of the latest census figures is used. The population served by a county library is generally the county population less the population served by other local libraries in the county.

Hours open: The number of hours a library is open on the regular weekly schedule, usually winter hours.

Registration: Two columns of statistics record the number of new borrowers registered during the year and the total as of the end of the year.

Staff: The number of full-time equivalents based on at least a 35-hour work week. The employes are classified by education or certification. The other category includes clerical people and others who do library work. Janitorial, maintenance and security employes are not included.

Volunteers: The data for volunteers is reported in full-time equivalents, counting only those who regularly work five or more hours weekly.

Books: The figures show the total number of items in the library's material collection, including those of branches, bookmobiles and other outlets.

Periodicals: For individual libraries, generally the figure is the total number of titles currently received by the library. In some cases, it may be the number of subscriptions.

Circulation: The total of books and other materials lent by the library during the year and the number of items per capita.

Interlibrary Loans: The number of items of materials lent and borrowed by each library.

INCOME CATEGORIES

Local tax: Total tax income or appropriations from local government units and school districts. Also included is indirect federal aid, as follows.

State aid: State aid received by a local library, county library, district center and regional library resource center. Included are state funds received by the Carnegie Library of Pittsburgh and the Free Library of Philadelphia to operate libraries for blind and physically handicapped persons.

Federal aid: Money received under the Library Services and Construction Act and similar federal programs, excluding revenue sharing money.

Other: Funds received from all other sources such as endowments, United Fund, fund drives, gifts, fines, fees and so on.

School districts: Receipts from school districts are isolated under this heading. School district income is included under the heading of Local Tax.

Indirect Federal Aid: Money not specifically intended for libraries received indirectly under federal programs through municipal governments or other agencies. Included are revenue sharing funds and the salaries of CETA employes assigned to the library. These funds are included under the heading of Local Tax.

EXPENDITURE CATEGORIES

Wages and salaries: Wages, salaries and fringe benefits, including janitorial and maintenance staff.

Books and periodicals: The expenditures for books, periodicals and other library materials.

Other operating: Expenditures for utilities, rent, supplies and other miscellaneous purposes. The amount includes expenditure for furniture, equipment, repairs and alterations.

Total operating: The sum of the previous three columns. All figures are rounded to the nearest dollar.

Operating per capita: The figure is based on the recorded operating expenditures and actual population served.

Capital: Monies expended for land, new buildings, alterations or new additions which add new floor area, and for the initial furniture and equipment for the new area.

Operating expenditures by source of income: The three columns report the total funds spent from the local, state and federal income categories. Federal includes only Library Services and Construction Act and similar library program money. It does not include "indirect federal aid."
